PROFESSIONAL EXPERIENCE

-  **Lead Software Engineer - Lowe's India Pvt Ltd** May 2025 - Present
-  **Senior Software Engineer - Lowe's India Pvt Ltd** Dec 2021 - Apr 2025
 - Lead post purchase user journey experiences, including order modification, cancellation, returns, and order tracking across customer facing applications
 - Major contributor to the Product Detail Page experience, including gallery, fulfillment, promotions, variant display, and various page level improvements
 - Contributed to the creation of a Module Federation framework and configured Jenkins deployment pipelines to support scalable micro frontend development and independent application releases
 - Integrated enterprise services such as order management systems, delivery platforms, item services, recommendations, payment, fraud verification, address validation, returns, and tracking
 - Created and led development of an AI order agent to help users retrieve order details, answer order related questions, and modify eligible orders
-  **Senior Associate Technology - Publicis Sapient** Feb 2020 - Dec 2021
 - Developed and enhanced Lowe's customer facing Product Detail Pages, focusing on page improvements, SEO, accessibility, and performance
-  **Full Stack Developer - Sneed Technologies Pvt Ltd** Jan 2018 - Feb 2020
 - Owned the complete technical function as the one person tech team for an early stage startup during the first year, involved in every stage from design to deployment, then led the engineering team in the following year

- Created a CRM website and mobile applications to manage leads, bookings, inventories, pricing, and integrated payment, email, WhatsApp, and SMS communication systems
- Improved SEO, page performance, and search accuracy by implementing Elasticsearch and optimizing search APIs

Associate Software Engineer - Tata Consultancy Services

Jan 2016 - Aug 2017

- Worked on internal insurance domain web applications, developing web pages and REST APIs while supporting maintenance, enhancements, and production issue resolution

KEY PROJECTS

Product Detail Page

Lowe's | Core Contributor

Recreated the Product Detail Page experience and a major contributor to the core base of the project. Developed multiple core components including the product gallery, fulfillments, promotions and rewards, and add to cart with quantity selection. Designed a template based page with configured components based on specific categories and implemented lazy loaded components to improve page loading and core web vitals.

Technologies: React, Redux, Node.js, Styled Components, Webpack, TypeScript

Module Federation Framework

Lowe's | Core Contributor

Created a framework built on Webpack Module Federation to support runtime component loading across micro frontends, heavily used across Lowe's applications.

Technologies: Webpack, Module Federation, React, Node.js, Jenkins, TypeScript

MyLow Order Agent

Lowe's | Team Lead

AI order assistant for retrieving order details, answering order questions, and processing eligible order modifications. Improved customer experience by enabling self service order management and reducing support tickets through intelligent AI assistance.

Technologies: Python, FastAPI, Redis, Google ADK, Windsurf, LLMs

Sneed CRM

Sneed Technologies | Sole Developer

CRM website for managing leads, creating bookings, generating payment links, and automating email, WhatsApp, and SMS communications. Enabled efficient lead management and customer engagement, reducing manual communication overhead and improving conversion rates.

Technologies: React, Node.js, Redux, MongoDB, Material UI, AWS, Amazon SES, Twilio, PayU
